

PPP Centar - Innovation

Clients and practitioners of the 3P Power XPIs© software may record and store the data in a web-based application for 25 - 30 years.

Calculation of reductions for defined Unitary Charges that Public Sector Client has to pay the Private party under PPP Contract.

Designing processes for successful Facility Management and standardization of building performance through automatization of data collection and analytical analysis of KPIs.

3P Power XPIs©

PPP Centar team of experts have developed a friendly software for monitoring of all Key Performance Indicators (KPIs) to manage operational stage, during the economic life of the constructed Facilities.

The unique software enables:

- Complete control under monitoring of Key Performance Indicators and Service delivery of all defined Performance Standards, under PPP Contract.
- Failure Defects and Quality Failures monitoring on a daily basis and identification of root causes of identified defects,
- Data base of all data and information in real time which enables Public sector to have full control of all executed activities at constructed Facilities, over a long time period (25-30 years of PPP contracts).
